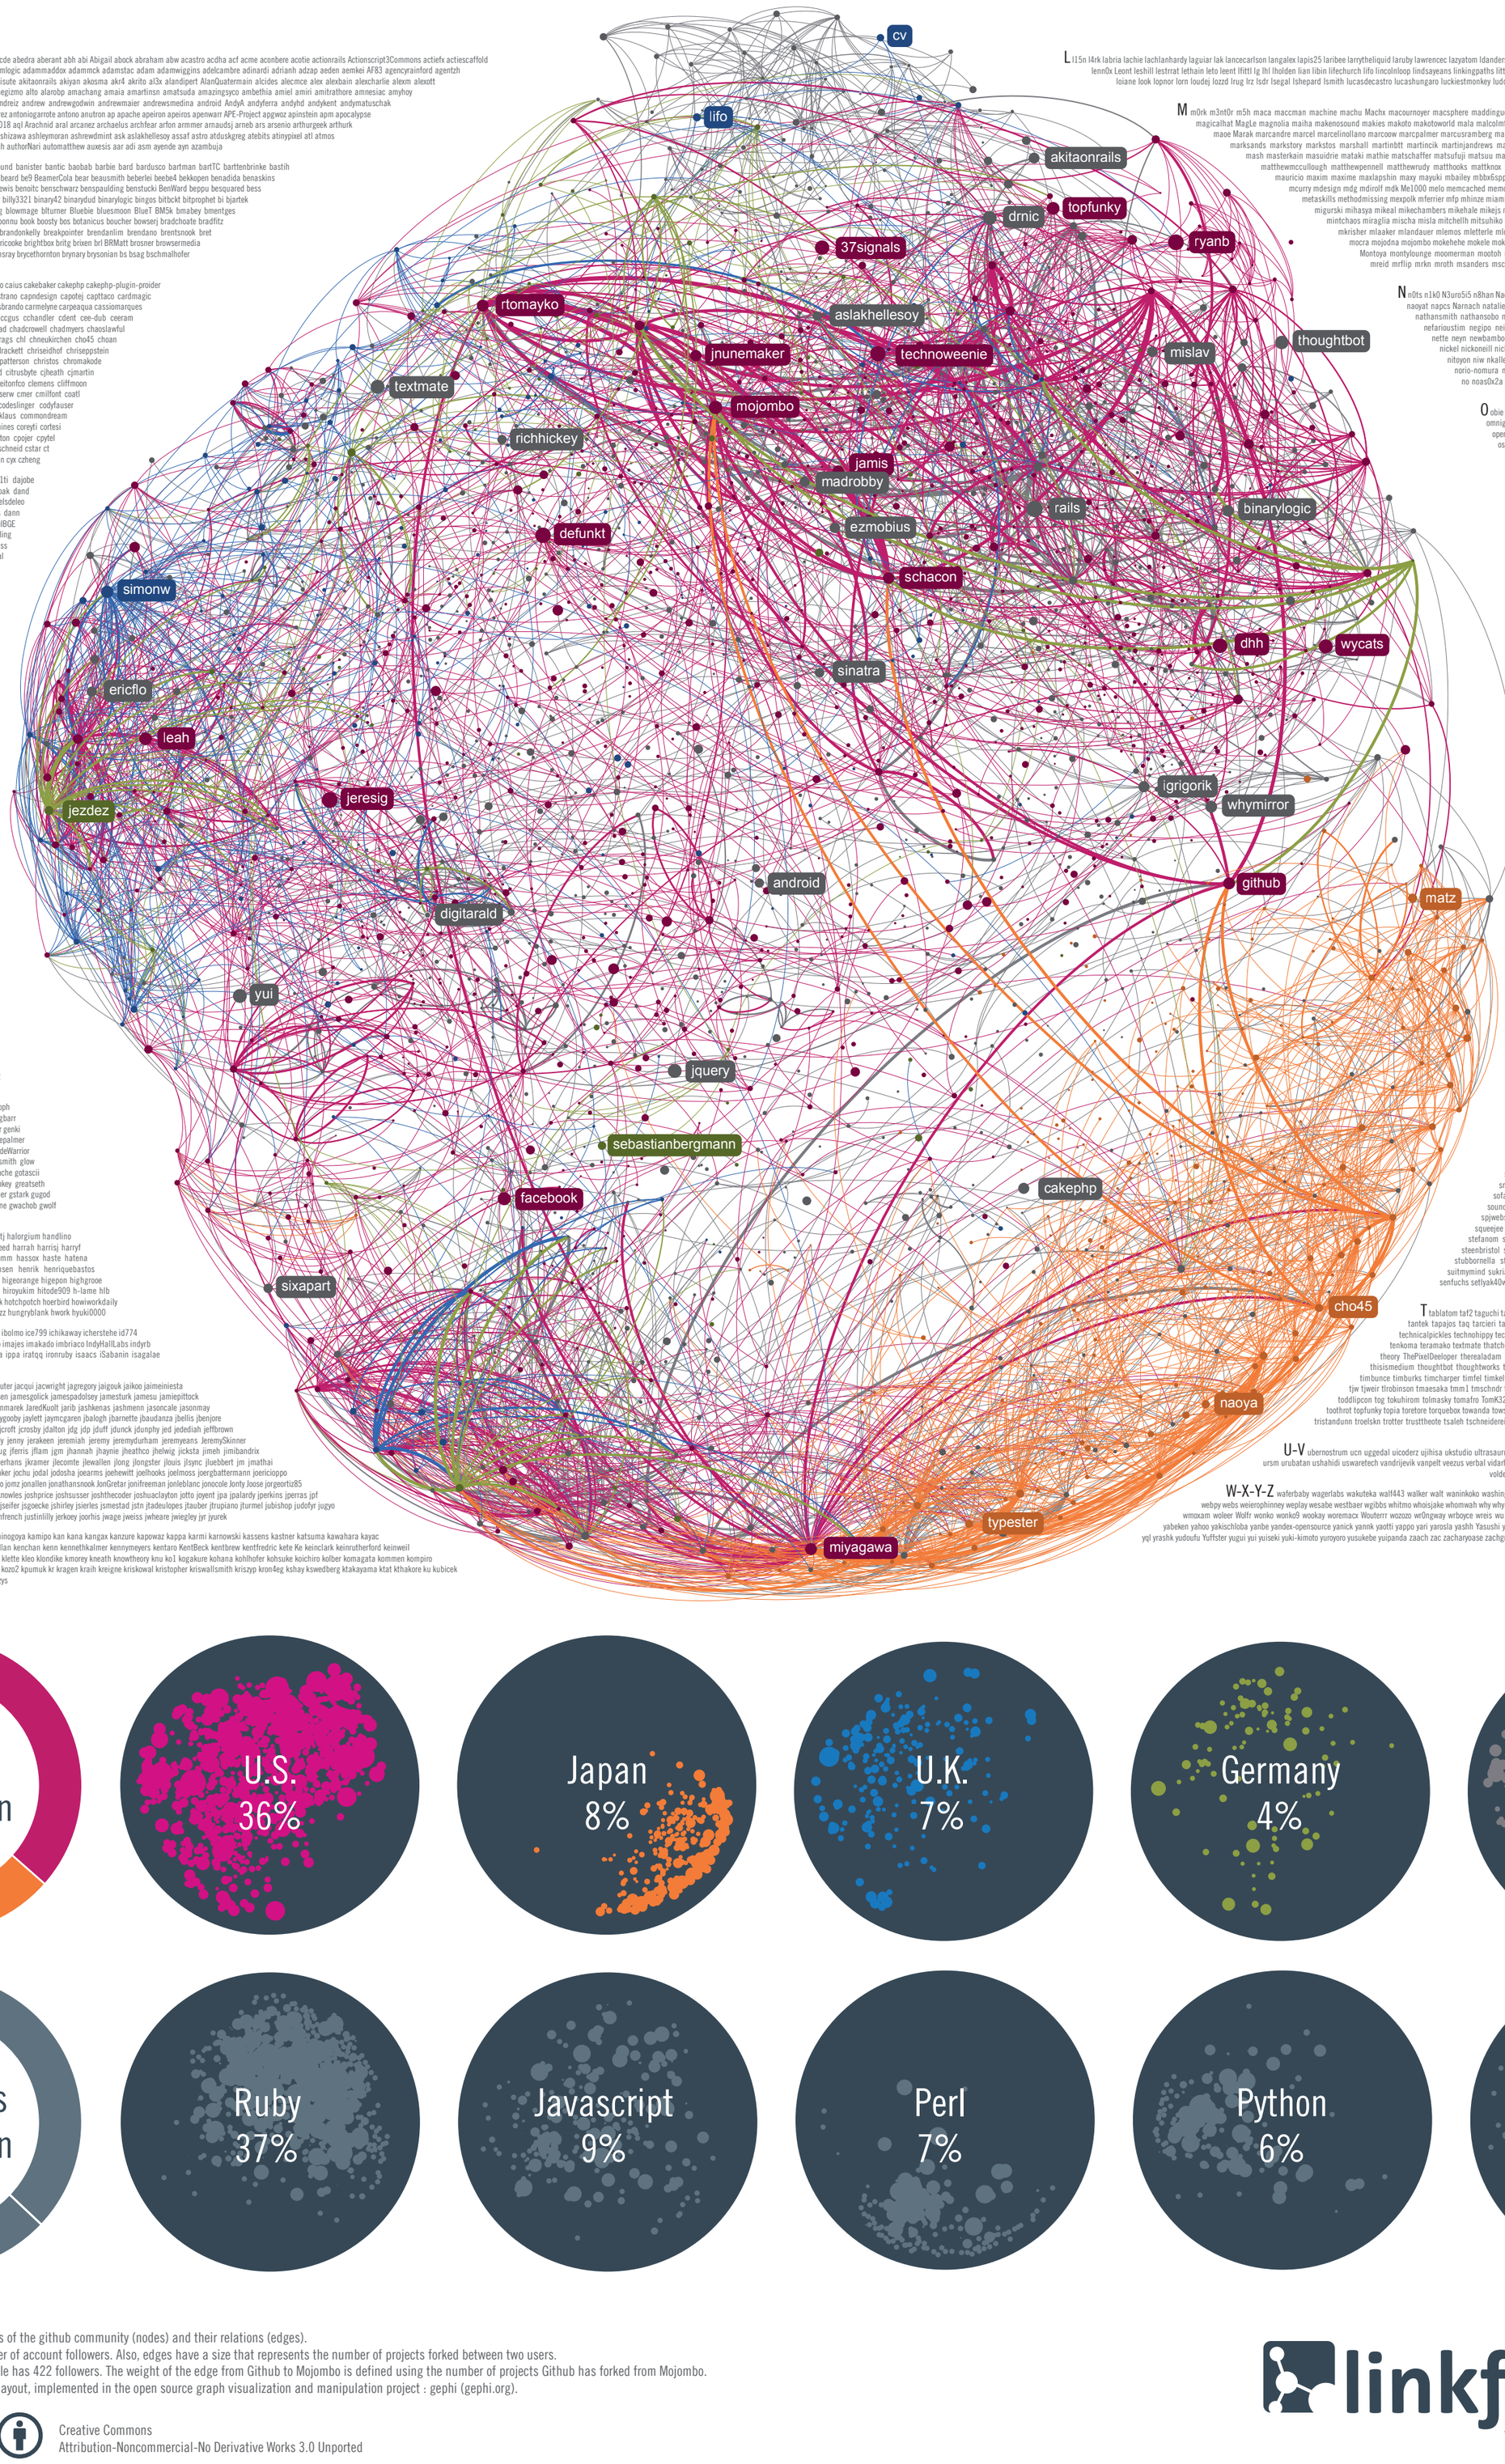
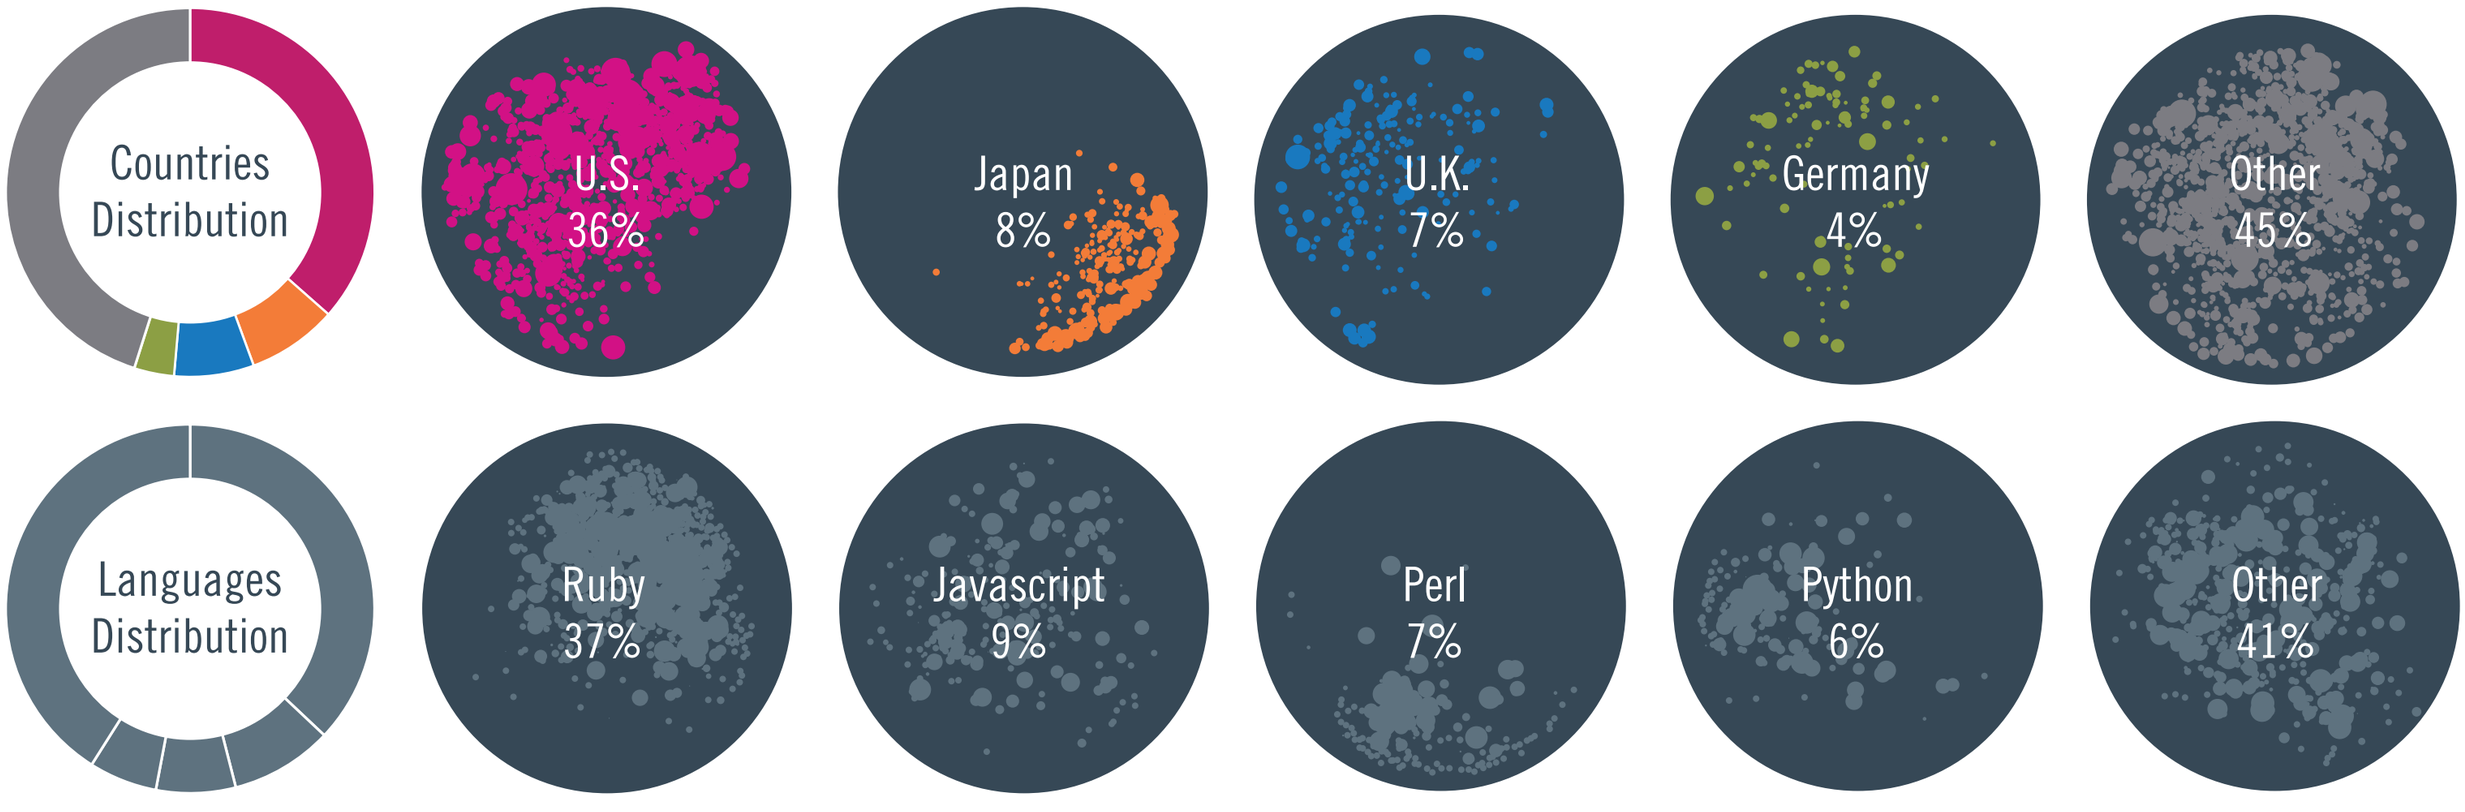
GITHUB COMMUNITIES

2770 Most Followed Users - JANUARY 2010

Nodes size : Number of followers
Edges weight : Number of forked projects





This map represents the 2770 main accounts of the github community (nodes) and their relations (edges).
The size of each node is related to the number of account followers. Also, edges have a size that represents the number of projects forked between two users.
Mojombo has 592 followers. The Github profile has 422 followers. The weight of the edge from Github to Mojombo is defined using the number of projects Github has forked from Mojombo.
Spatialization is the result of the forceatlas layout, implemented in the open source graph visualization and manipulation project : gephi (gephi.org).
